Automated Kanban Label Printing with PDF Splitting Tool

Common challenges

- Manual cutting of printed labels is extremely time-consuming and labour-intensive.
- Using cutting tools pose unnecessary risk to workers' safety.
- Tremendous efforts are taken to manage multiple label layouts with different dimensions.

Benefits of using PDF Splitting Tool

Save time and cost while driving productivity by rechannelling manpower for value-adding activities
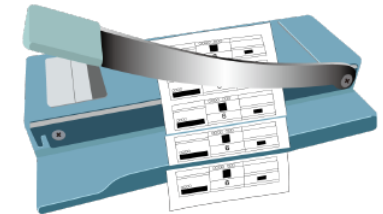

- With PDF Splitting Tool, manufacturers do not have to spend time to assign workers to cut labels manually into desired size.

Reduce hazard and provide a safe environment for workers

- Workers do not have to handle cutting equipment which could cause potential safety incidents, thus providing peace of mind.

BEFORE:
Print labels on single page and cut manually into desired size

AFTER:
Split PDF data into individual labels using PDF Splitting Tool, then print each label in desired size

Save work time by 60%!*

*Based on SATO's internal testing
